

## AMANO GROUP

### DEAR GUESTS „WE ARE READY!”

Protecting our guests and employees is a top priority in the AMANO Group. We have adjusted our hygiene standards and service processes. Our employees are trained according to the latest hygiene guidelines.

#### RESTAURANTS

##### RESTAURANT VISIT

- Always keep a minimum distance of 1.5 metres to each other.
- Wait in front of the restaurants, if the distance inside cannot be guaranteed.
- Please wait to be seated by our staff.
- Please complete the contact tracking form provided.
- Only members of two different households are allowed at one table.
- If necessary, please follow the instructions of the staff.
- Distance zones have been marked and we kindly ask you to follow them.
- You can easily read our menu on your phone using the QR code displayed on your table. If this is not possible for you, there are laminated menus available.

##### CONTACTLESS PAYMENT

- Please use the possibility to pay by credit card or debit card.
- If you are paying with cash, please use the storage provided.
- Please also keep the minimum distance when paying.

##### PROTECTION AT HOME

- If you have a cough and runny nose, please do not visit us.
- Please wash your hands carefully before and after visiting us.
- Please stick the known corona hygiene rules.

#### AIR PURIFICATION

##### AIR PURIFIERS

- All restaurants are equipped with CASADRON air purifiers
- These make it possible to filter the virus and aerosol concentration in closed rooms and constantly clean the air
- Effective way of reducing the risk of infection
- The air purifier are environmentally friendly and do not cause any additional impact to our environment.

##### HOW DOES IT WORK?

The air we exhale can contain viruses. This is also the case with SARS-CoV-2 (COVID-19), which we release into the air when we breathe, cough, speak and sneeze. These viruses do not move individually in the air, but are enclosed in larger droplets, so they move in the form of an aerosol.\* These aerosols now cling to the suspended particles in our air. The air purifier soaks up the air, cleans it and releases the cleaned air back into our environment. The CASADRON system continuously cleans the air and works reliably even with open windows or doors and also with air-conditioning systems and heaters.
